## Relevant Topics

Honduras' Global Debut in 2013: The Honduran Ministry of Finance placed two index eligible global bonds in 2013. The first $\$ 500$ million Global Bond, placed Q1 2013, was a 10 year maturity amortizing 2022, 2023 and 2024 with a coupon of $7.50 \%$. The country's second $\$ 500$ million Global Bond sale in 2013 closed December 2013, and was structured as a 7 year with a single bullet amortization in 2020 and an $8.75 \%$ coupon. Of the December global bond sale, half the proceeds were reserved for the 2014 Budget, reducing the needed domestic market placement in 2014 by L5,000 million ( $\$ 250 \mathrm{~mm}$ ).

Indicators: The debt indicators for 5 years through 2013 are on the following page. While the 2013 are preliminary, no significant changes are expected. The primary cause for small changes in the debt stock is delayed reporting of loan disbursements. Prior years are final. It should be noted that the year-end outstanding debt includes the full amount of the global issued. The debt stock is not adjusted for retained cash nor for accounts payable.
